About Me

Energetic and tech-savvy final year Technology student, Strong in communication and technical fundamentals with a deep interest in customer service. I'm eager to begin my career in the AR Associate role in Omega healthcare, where I can apply my logical thinking, empathy, and attention to detail in delivering high-quality customer support and service excellence.

Projects

Hamzuu – AI-Powered Educational Platform

- Built mobile & web applications to guide students from 10th grade onward
- Designed UI, integrated AI for personalized career suggestions
- Documented user queries and improved onboarding flows for support

AI-Enabled & Mind-Controlled Wheelchair (Hackathon Finalist)

- Developed AI-integrated system to assist differently-abled using brain signals
- Recognized nationally for innovation and user-focused design
- Worked in a team of 4, maintaining detailed technical logs and reports

Achievements

- Finalist in National Healthcare Hackathon (AI Wheelchair Project)
- Recognized for leadership and problem-solving at multiple college events
- Voluntarily attended and supported tech hackathons and innovation workshops

WHY I'M A GOOD FIT

I'm strong in core programming, OOPS, SQL, and problem-solving.

Quick learner with a passion for efficient, clean code.

Experienced in simplifying tech through educational content and workshops.

Skilled with tools like Canva and IMS for engaging communication.

Confident, motivated, and a great fit for both technical and cultural aspects of the role.
